# CONTENTS

## 1. OVERVIEW OF C++

C++ Design Goals

C++ Overview

Difference between C and C++

Major C++ Enhancements

Important Minor C++ Enhancements

Useful Minor C++ Enhancements

Object Oriented Programming

## 2. Basics of C++

Structure of C++ Program:

C++ Console I/O:

Character set

DATA TYPES

New and Delete Operators (Memory Management Operators):

Order of precedence

Type conversion and casts

Escape Sequence:

Manipulators

Save the program

Compile and link the program

Running the program

### **3. CONTROL STRUCTURES**

Simple if statement:

Nested if statement:

If - else - if ladder:

Switch statement

Iteration Statements:

1. While Loop:

2. Do - While Loop:

3. for Loop:

Jump Statements:

### **4. Classes objects**

Class General Format:

Access specifiers:

### **5. Functions**

Function Prototyping:

Call By Reference:

Returning Reference:

Recursion

Inline function

Friend function

## 6.

### **arrays and pointers**

One Dimensional Array:

Multi-dimensional Array:

Pointers

Arrays and Pointers:

Functions and Pointers:

Objects and Pointers:

This Pointers:

Pointers to Pointers:

## 7.

### **INHERITANCE**

Need for Inheritance:

Single Inheritance

Multilevel Inheritance

Hierarchical Inheritance

Multiple Inheritance:

Hybrid Inheritance

Access Protection:

Visibility Mode:

Virtual Base Class:

Pointers to derived class (Used in virtual function)

## **8. Constructors And Destructors**

Constructors

Default Constructors

Parameterized Constructors

Copy Constructors

Destructors:

## **9. POLYMORPHISM**

Virtual Function

Pure Virtual Function

Function Overloading

Inline functions:

OPERATOR OVERLOADING

## 10. I/O CONSONLE AND FILE

I / O Basics:

Using I/O manipulator:

Creating Your Own Inserters:

Creating Your Own Extractors:

FILE

Creating Your Own Manipulators

File I/O Basics:

Command Line Argument:

Unformatted Binary INPUT/OUTPUT

Write Object into File:

Read Object from File:

More unformatted I/O functions:

Different form get () function:

Checking the I/O status:

Customized I/O and Files:

Exception handling

Templates:
